

(f) Schedule I includes a list of approved programs to support the maximization of domestic energy supplies. A Department of Energy regulation setting forth the procedures and criteria used by the Department of Energy in making its determination and findings is published in 10 CFR part 216.

[49 FR 30414, July 30, 1984. Redesignated at 54 FR 601, Jan. 9, 1989, as amended at 63 FR 31923, June 11, 1998]

### Subpart F—National Emergency Preparedness and Critical Items

SOURCE: 63 FR 31923, June 11, 1998, unless otherwise noted.

#### § 700.30 Priorities and allocations in a national emergency.

(a) In the event of a national emergency, special rules may be established as needed to supplement this part, thus ensuring rapid industrial response and the timely availability of critical industrial items and facilities to meet the urgent national defense requirements, including domestic emergency preparedness requirements, of approved programs.

(1) *Emergency official actions.* (i) As needed, this part may be supplemented to include additional definitions to cover civilian emergency preparedness industrial items, support for essential civilian programs, and provisions for the taking of certain emergency official actions under sections §§ 700.60 through 700.63.

(ii) Emergency official actions may include:

(A) Controlling inventories of critical and scarce defense and/or emergency preparedness items;

(B) Restricting the purchase, use, or distribution of critical and scarce defense and/or emergency preparedness items, or the use of production or distribution facilities, for non-essential purposes; and

(C) Converting the production or distribution of non-essential items to the production or distribution of critical and scarce defense and/or emergency preparedness items.

(2) *Allocation of critical and scarce items and facilities.* (i) As needed, this part may be supplemented to establish special rules for the allocation of

scarce and critical items and facilities to ensure the timely availability of these items and facilities for approved programs, and to provide for an equitable and orderly distribution of requirements for such items among all suppliers of the items. These rules may provide for the allocation of individual items or they may be broad enough to direct general industrial activity as required in support of emergency requirements.

(ii) Allocation rules (i.e., controlled materials programs) were established in response to previous periods of national security emergency such as World War II and the Korean Conflict. The basic elements of the controlled materials programs were the set-aside (the amount of an item for which a producer or supplier must reserve order book space in anticipation of the receipt of rated orders), the production directive (requires a producer to supply a specific quantity, size, shape, and type of an item within a specific time period), and the allotment (the maximum quantity of an item authorized for use in a specific program or application). These elements can be used to assure the availability of any scarce and critical item for approved programs. Currently, a set-aside applies only to metalworking machines (see § 700.31).

(3) In the event that certain critical items become scarce, and approved program requirements for these items cannot be met without creating a significant dislocation in the civilian market place so as to create appreciable hardship, Commerce may establish special rules under section 101(b) of the Defense Production Act to control the general distribution of such items in the civilian market.

(b) *Regional Emergency Coordinators.*

(1) If due to a catastrophic national security emergency event, communications with Commerce headquarters in Washington, D.C. are severed, DPAS Emergency Delegation 1 will provide authority to the Regional Emergency Coordinators (REC) located in the Standard Federal Region Council cities (Boston, New York, Philadelphia, Atlanta, Dallas, Kansas City, Chicago, Denver, San Francisco, and Seattle) to represent the Secretary of Commerce,

## **§ 700.31**

and as necessary, act for the Secretary to carry out the emergency industrial production and distribution control functions of Commerce as set forth in this part, in any supplement thereto, or other applicable authority. See DPAS Emergency Delegation 1 for further information about the authority and duties of the RECs, and the effective date of the Delegation.

(2) If DPAS Emergency Delegation 1 is implemented due to a catastrophic national security emergency event, requests for special priorities assistance under §§ 700.50 through 700.55 should be filed with the nearest Regional Emergency Coordinator located in one of the Standard Federal Region Council cities as provided in DPAS Delegation 1.

### **§ 700.31 Metalworking machines.**

(a) “Metalworking machines” include power driven, manual or automatic, metal cutting and metal forming machines and complete machines not supported in the hands of an operator when in use. Basic machines with a list price of \$2,500 or less are not covered by this section.

(b) Metalworking machines covered by this section include:

- Bending and forming machines
- Boring machines
- Broaching machines
- Drilling and tapping machines
- Electrical discharge, ultrasonic and chemical erosion machines
- Forging machinery and hammers
- Gear cutting and finishing machines
- Grinding machines
- Hydraulic and pneumatic presses, power driven
- Machining centers and way-type machines
- Manual presses
- Mechanical presses, power driven
- Milling machines
- Miscellaneous machine tools
- Miscellaneous secondary metal forming and cutting machines
- Planers and shapers
- Polishing, lapping, boring, and finishing machines
- Punching and shearing machines
- Riveting machines
- Saws and filing machines
- Turning machines, lathes, including automatic
- Wire and metal ribbon forming machines

(c) A metalworking machine producer is not required to accept DO rated orders calling for delivery in any

## **15 CFR Ch. VII (1–1–01 Edition)**

month of a total quantity of any size of machine in excess of 60 percent of scheduled production of that size of machine for that month, or any DO rated orders received less than three months prior to the beginning of the month for which delivery is requested. However, DX rated orders must be accepted without regard to a set-aside or the lead time, if delivery can be made by the required date.

[49 FR 30414, July 30, 1984. Redesignated at 54 FR 601, Jan. 9, 1989. Further redesignated at 63 FR 31924, June 11, 1998]

### **Subpart G [Reserved]**

### **Subpart H—Special Priorities Assistance**

#### **§ 700.50 General provisions.**

(a) The DPAS is designed to be largely self-executing. However, it is anticipated that from time-to-time problems will occur. In this event, a person should immediately contact the appropriate contract administration officer for guidance or assistance. If additional formal aid is needed, special priorities assistance should be sought from the Delegate Agency through the contract administration officer. If the Delegate Agency is unable to resolve the problem or to authorize the use of a priority rating and believes additional assistance is warranted, the Delegate Agency may forward the request to the Department of Commerce for action. Special priorities assistance is a service provided to alleviate problems that do arise.

(b) Special priorities assistance can be provided for any reason in support of this regulation, such as assisting in obtaining timely deliveries of items needed to satisfy rated orders or authorizing the use of priority ratings on orders to obtain items not automatically ratable under this regulation.

(c) A request for special priorities assistance or priority rating authority must be submitted on Form BXA-999 (OMB control number 0694-0057) to the local contract administration representative. Form BXA-999 may be obtained from the Delegate Agency representative or from the Department of
